Computer Science

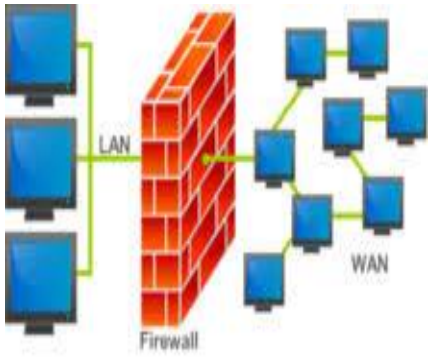
"Computer Science drives our planet"

This course is good for students who:

- want to develop their IT skills, who like solving problems, are logical thinkers and can work independently

What topics will you be studying?

- Problem-solving with programming
- Computational thinking
- Data – binary and hexadecimal
- Hardware and software
- Networks
- Issues and impact of an increased use of IT systems

What do students studying this qualification go on to do?


- Web designers
- Programmers
- Cyber security experts
- Systems architects
- Network support
